

WORKSHOP NOVEMBER 2024

ENDOVASCULAR TREATMENTS OF PAD

TIPS AND TRICKS ON NEW DEVICES AND TECHNIQUES

November, Tuesday 5th and Wednesday 6th, 2024

Hirslanden Clinique des Grangettes

Chemin des Grangette, 7

1224 Chêne-Bougeries

Dear Colleagues,

We are pleased to invite you to the « **Endovascular treatments of PAD Workshop**», which will be held at Hirslanden Clinique des Grangettes on the 5th and 6th of November 2024.

In the last decades, peripheral endovascular interventions have increased worldwide. Thanks to new devices and especially to new revascularization techniques, complex, as well as very complex lesions, are increasingly treated percutaneously. The endovascular approach is nowadays considered as the first line treatment option in many centers, when surgery is only reserved in cases of endovascular failure.

The aim of this workshop is to:

- Get the essential tips and tricks of complex peripheral interventions from the medical and catheterization lab personnel's point of view
- Discuss about endovascular material and techniques, in order to safely and efficiently start or improve any endovascular activity
- Discuss about new techniques and dedicated devices used to treat complex TASC C-D lesions

Robert F. Bonvini M.D., interventional cardiologist and angiologist at Hirslanden Clinique des Grangettes, will first develop different theoretical dimensions. A visit of the catheterization-lab with a peripheral material review will then be conducted along with seven practical endovascular cases in the 2-day Workshop.

This conference is opened to interventional radiologists, cardiologists, angiologists and vascular surgeons. We look forward to welcoming you at Hirslanden Clinique des Grangettes.

Robert F. Bonvini, M.D.

PROGRAM

Tuesday, November 5th, 2024

09h00	Welcome and Workshop presentation Lobby - main entrance
10h00	First scheduled case Cath. Lab.
11h30	Second scheduled case Cath. Lab.
13h00	Lunch Cath. Lab.
14h00	Third scheduled case Cath. Lab.
16h00	Review of DES techniques and New Devices Discussion Lobby - main entrance
17h30	End

Wednesday, November 6th, 2024

08h00	Meeting point Cath. Lab.
08h30	First scheduled case Cath. Lab.
10h00	Second scheduled case Cath. Lab.
12h00	Lunch Tea Room
13h00	Third scheduled case Cath. Lab.
14h30	Fourth scheduled case Cath. Lab.
16h00	End

Training credits in the process of being obtained from the following medical societies :

- Société Suisse d'Angiologie
- Société Suisse de Chirurgie Vasculaire

We are looking forward to welcoming you at this event

Registration :
